

1 / 6

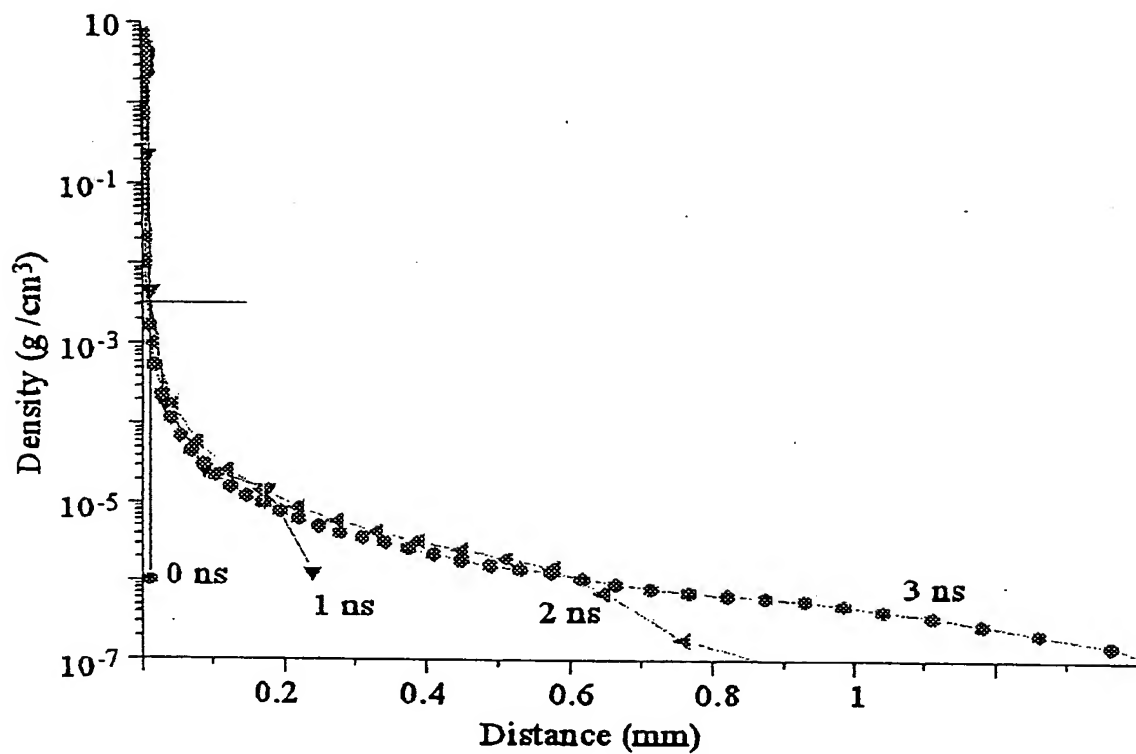

FIG. 1

Temporal progress of density profile when sphere target of 20 μm diameter is irradiated with laser

2 / 6

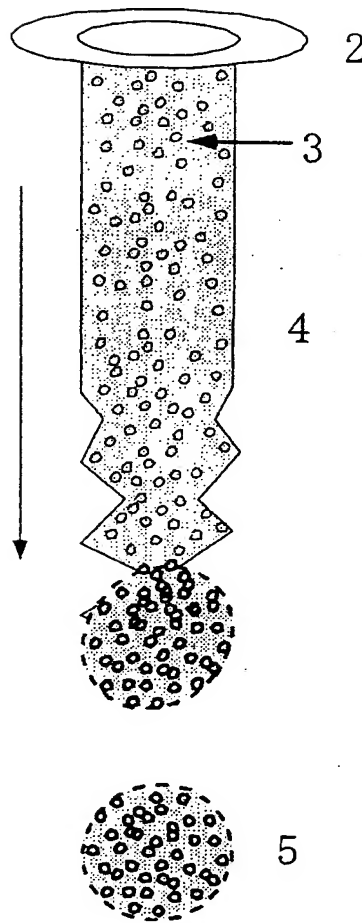

FIG. 2

Temporal progress of density profile when sphere target of  $20 \mu\text{m}$  diameter is irradiated with laser

3 / 6

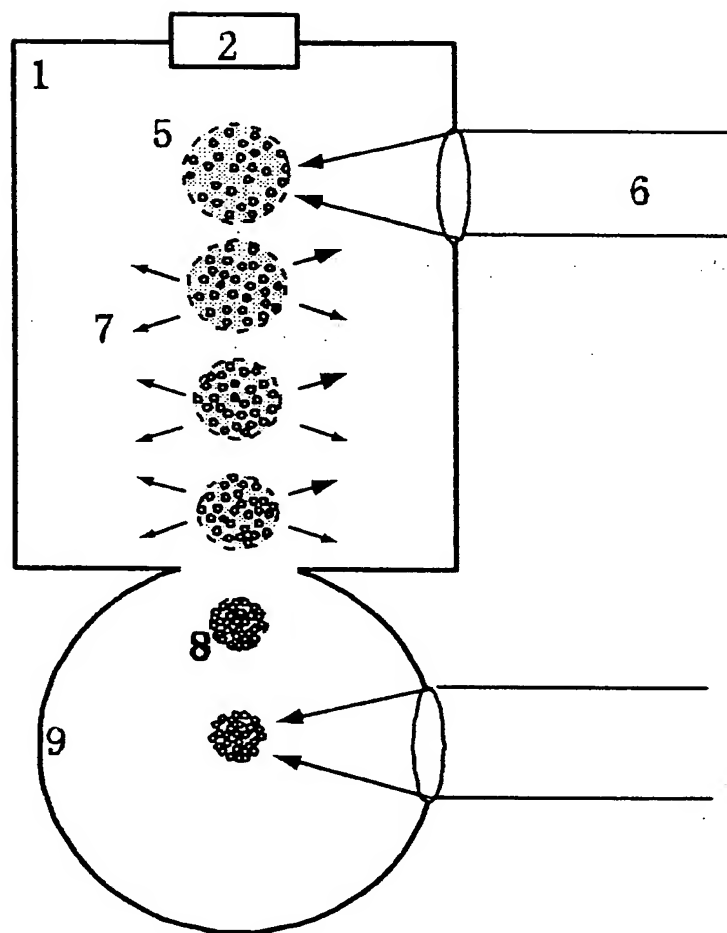

FIG. 3

Production of droplets of suspension including ultrafine particles

4 / 6

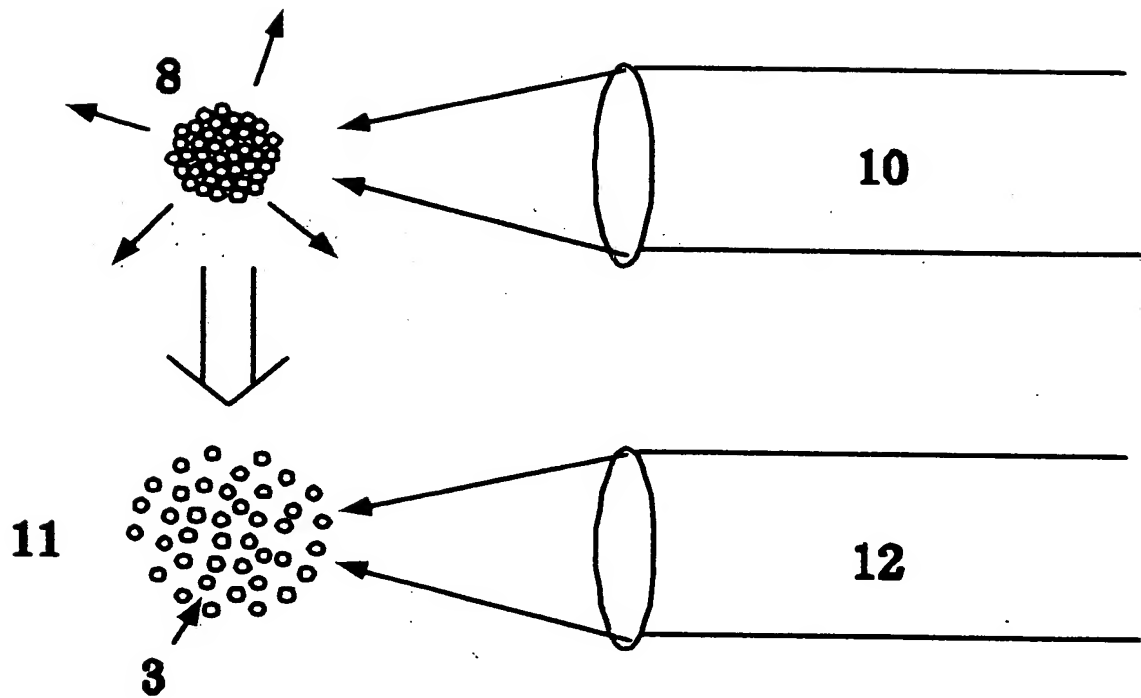

FIG. 4

Formation of particle-cluster

5 / 6

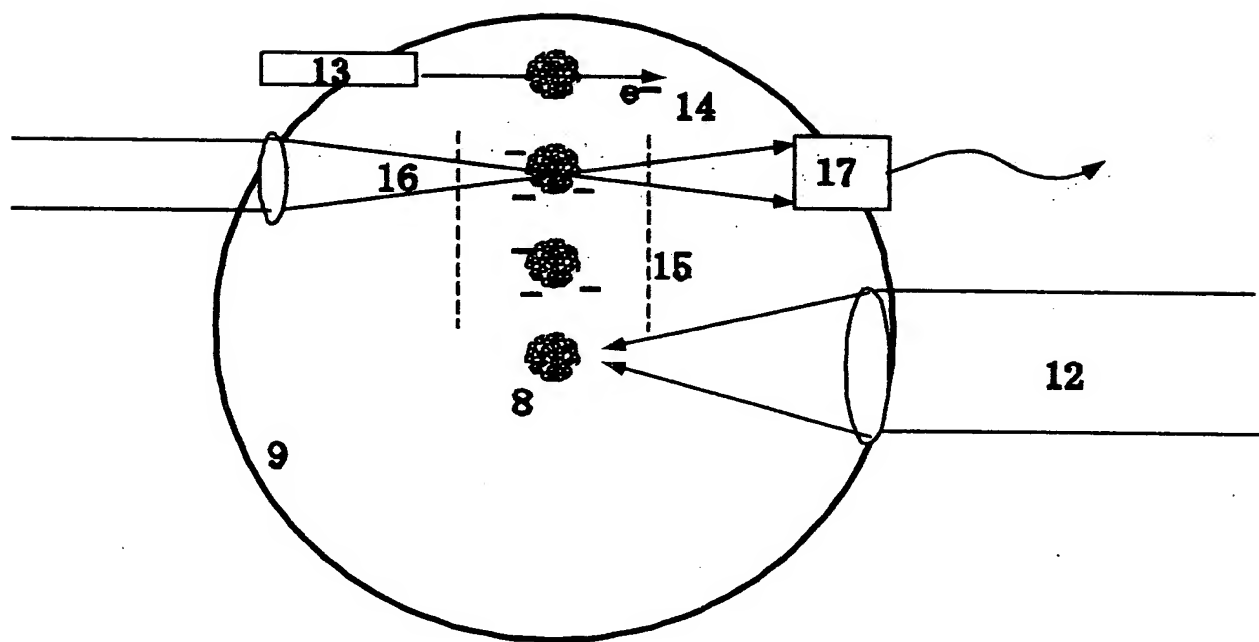

FIG. 5

Dispersed particles of cluster strongly irradiated with pulsed laser

6 / 6

FIG. 6

Control of trajectory of particle cluster
